

CS2043 Team 8 Design Project: Deliverable 0

Project Infrastructure

<TBD>

Contributors: Gian Karl Cera, Hazem Alfeky, Dexter Lyons, Thanh Nguyen

Roles and responsibilities

- Gian Karl Cera, Scrum Master
 - Organize Trello board
 - Organize meetings
 - Ensures Scrum practices are followed
 - Commits to the work during a sprint
- Dexter Lyons, Lead developer
 - Leads implementation and ensures software quality
 - Commits to the work during a sprint
 - Lead developer helps set up remote repo
- Hazem Alfeky, Product Manager
 - Communication with customer team
 - Get clear feedback from customers
 - Commits to the work during a sprint
- Phuc Minh Thanh Nguyen, Documentation lead, dev team
 - Commits to the work during a sprint
 - Documents git hub changes
 - Responsible for maintaining project documentation

Team expectations

- Everyone is expected to contribute to the project
- Everyone is expected to contribute at least 3 hours to the project weekly
- There should daily updates and weekly meetings are mandatory
- Everyone is expected to pass in work before deadline
- If a person asks for help, team members should listen and help
- Expect a reduced project grade if you don't contribute much to the implementation

What to do when you are blocked or stuck

- Consult relevant sources of information
- Consult a person on the team
- Consult an instructor or a TA

What we agree to report on, and be reported on, in our team assessments

- Productivity of each team member
- Missed meetings
- Lack of communication
- Quality of work

Additional Rules to help mitigate risky behaviours

- Conflicts should try to be resolved by the team first
- If a conflict happens that the group can't resolve by itself, the conflict will be taken straight to the instructor
- Stolen work is to be reported to the instructor immediately upon discovery

- Missing too many meetings / lacks participation will be reported to the instructor
- If a team member falls behind help is expected but only to a point and the rest is on the offending team members shoulders

Tools

- GitHub
- Jira
- Teams
- IntelliJ with Maven
- Languages
 - Java
 - SQL
